SPACIOUS GRAND MANOR

Exciting European elements make this home an attractive choice. Its spacious floor plan lives like a grand manor. The main level includes all the space you'll need for elegant entertaining and family gatherings.

A formal living room includes a tray ceiling and a fireplace and is open to the formal dining room. A butler's pantry connects the dining room to the L-shaped kitchen with island cooktop. A nook with double-door access to the rear yard is attached. The family room and den share a through fireplace - built-ins flank the hearth on the family-room side. Tucked behind the triple garage is a laundry area with utility sink.

The upper level holds not only four bedroom suites, but also space for a game room. Family bedrooms share a full bath, while the master suite pampers the lucky homeowner with a study area and a bath with spa tub.
